Subject: Pre-Labor Day Weekend Harmful Algal Bloom (HABs) Assessment Map Available!
Attachments: ATT00001.txt

California Water Quality Monitoring Council

The California Water Boards and their partners conducted targeted sampling at approximately 60 of California's most visited lakes, rivers, and reservoirs that have a history of HABs. The assessment results of this collaborative effort are displayed in an interactive map that shows sampling locations and recommended advisory levels. Please remember to practice Healthy Water Habits when out enjoying the outdoors this holiday weekend, including keeping your pets away from algae and scum if you think a HAB is present.

Check out the interactive map by clicking the image below!
